

FORT MEADE RAB  
PRESENTATION  
September 11, 2008

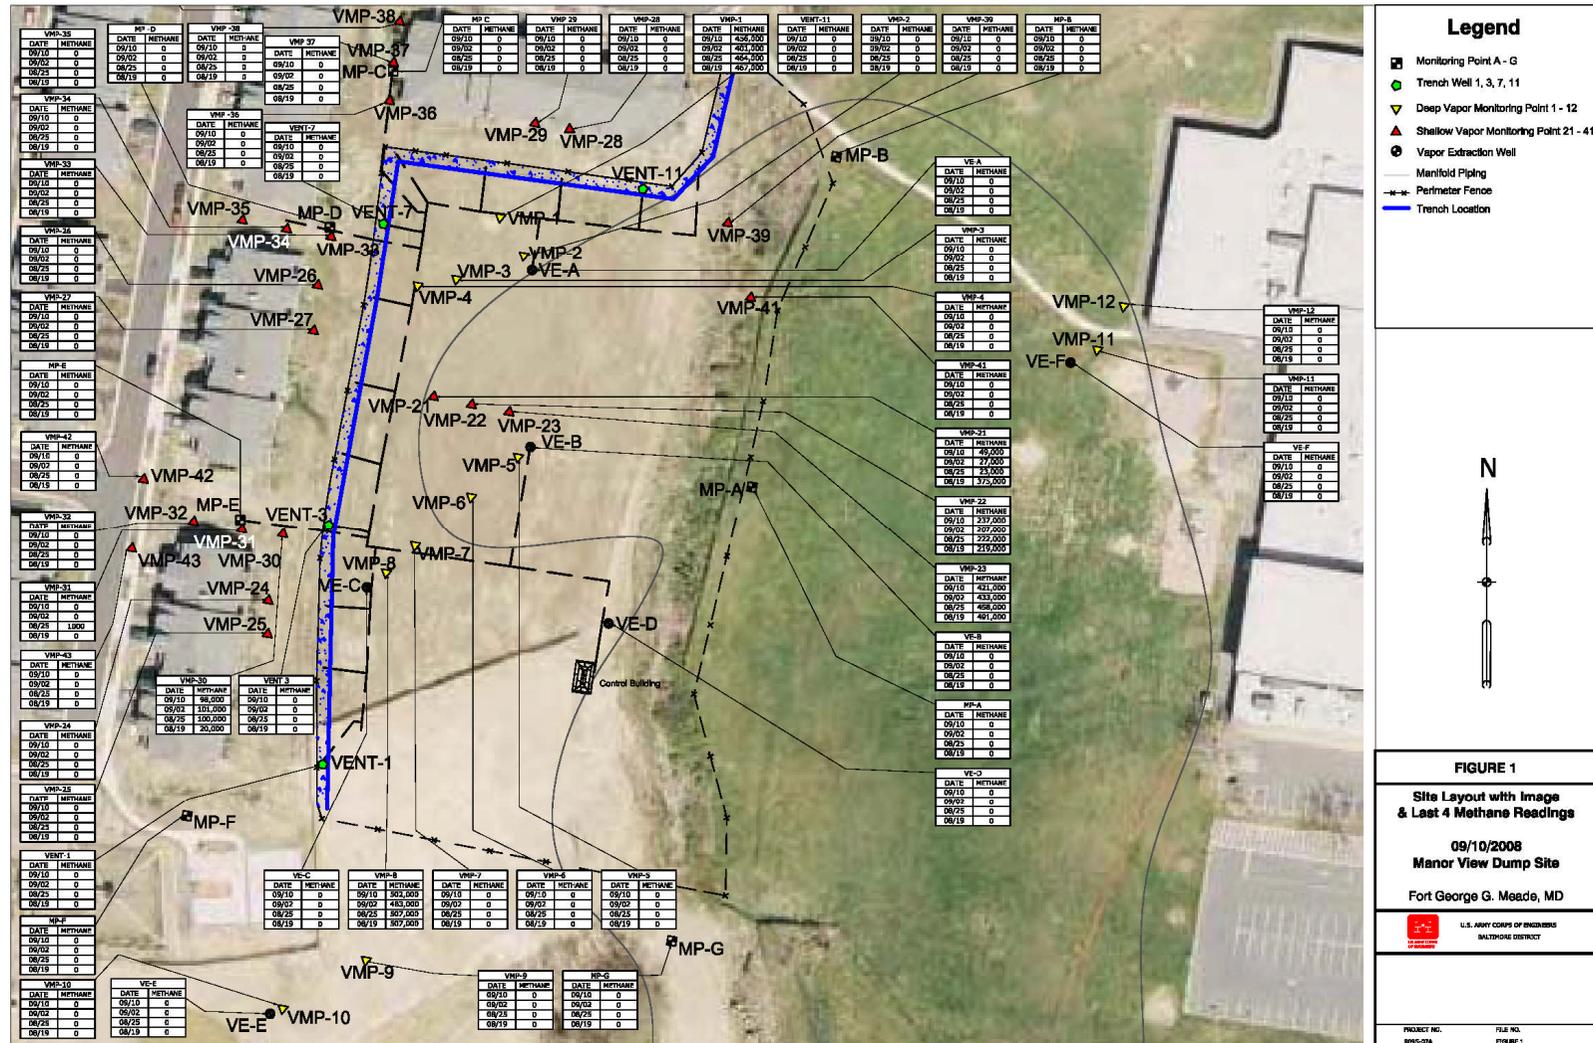

Manor View Dump Site  
Active System Update

Chris Boes  
Plexus Scientific Corporation

# Activities

- Continued O&M and monitoring activities – weekly.
- New methane extraction blower functioning as anticipated; no system shutdowns due to blower malfunction.
- New moisture separator (knock-out pot) functioning as anticipated; no system shutdowns due to excess condensate entrainment
- Continued after-hours response by contracted personnel; all restarts conducted within four hours of system shutdowns
- Continued data evaluation and valve adjustments to maximize methane recovery throughout the system
